SUMMARY

Second year student at Vellore Institute of Technology Chennai pursuing B.Tech Computer Science with specialization in AI and Machine Learning, looking for a Full Stack / Frontend Internship to apply expertise in real-world projects.. Detail-oriented Full Stack Developer skilled in creating scalable web applications with React, TypeScript, and MySQL. Developed end-to-end solutions featuring authentication, real-time data processing, and responsive UI design.

EDUCATION

B.Tech: Computer Science, Specialization in Artificial Intelligence & Machine Learning

Vellore Institute of Technology - Chennai | GPA: 8.71 | Class of 2028

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Artificial Intelligence, Machine Learning, Operating Systems, Computer Networks, Software Engineering, Web Development
-

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, C
 - Frontend: React.js (Hooks, Context API), JSON, HTML5, CSS3, Tailwind CSS
 - Backend: Node.js, Express.js, RESTful API development
 - Databases: MySQL (SQL), Supabase, Convex (NoSQL)
 - Tools & Platforms: Git (version control), GitHub, Postman, Vercel, Netlify
 - Concepts: Data Structures & Algorithms, OOP, Authentication (Clerk), Asynchronous Programming (async/await), Responsive Design
-

PROJECTS

Splitzy – Expense Management Platform

[Live](#) | [Github](#)

Tech Stack: React.js, TypeScript, Clerk, Convex, CSS

- Built a full-stack expense management platform supporting multi-user group expense tracking and settlements

- Implemented secure authentication using Clerk with protected routes and session management
- Designed real-time data synchronization using Convex for seamless updates across users
- Engineered flexible expense-splitting logic (equal, percentage, custom) to handle diverse use cases

PixelQuest – Gamified Task Management System

[Live](#) | [Github](#)

Tech Stack: TypeScript (TSX), CSS

- Developed a gamified task management application to improve user engagement and habit consistency
- Implemented difficulty-based task classification with reward-driven progression mechanics
- Designed a virtual economy system (coins, streaks, multipliers) to incentivize user retention
- Managed application state and asynchronous updates to ensure smooth and responsive user experience

Interface Critic – AI-Based UI Analysis Tool

[Live](#) | [Github](#)

Tech Stack: TypeScript, Supabase, CSS

- Built an AI-powered UI/UX analysis tool to evaluate websites using screenshots or URLs
 - Developed a feedback engine generating structured UI critiques with actionable recommendations
 - Implemented backend data handling and request processing using Supabase
 - Processed and analyzed UI data to generate structured feedback with categorized issue detection
-

ACHIEVEMENTS

- Winner – IEEE Patchfest Hackathon, contributed 40+ pull requests and resolved 20+ issues within 24 hours
 - Participated – Google Developer Group (GDG) Hackathon, collaborated in rapid prototyping and product development
 - Participated – Android Club Hackathon, built a Flutter application enabling real-time location tracking, ETA-based route monitoring via Google Maps API, and periodic safety alerts
 - Participated – College Hackathon, developed a database-driven student analytics platform with visual dashboards to identify subject-level performance gaps and improvement areas
-

EXPERIENCE

Independent Full Stack Development

| Jan 2024 – Present

- Built and deployed 3+ full-stack applications using React, TypeScript, and RESTful APIs
 - Implemented authentication systems, real-time data handling, and responsive UI design
 - Managed deployments using Vercel and Netlify with version control via Git
-

LEADERSHIP AND ACTIVITIES

- IEEE Computer Society, Core Member, Contributed to technical initiatives and collaborative development activities.
- Music Club, Core & Marketing Member, Managed promotional activities and coordinated events, improving engagement and participation.
